PROGRAM STUDI S1 INFORMATIKA

FAKULTAS INFORMATIKA

TELKOM UNIVERSITY PURWOKERTO

2024

1. SOAL 1 Source Code

```
package main

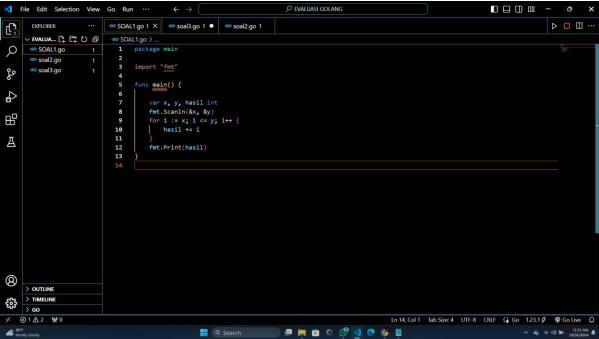

import "fmt"

func main() {

    var x, y, hasil int
    fmt.Scanln(&x, &y)
    for i := x; i <= y; i++ {
        hasil += i
    }
    fmt.Print(hasil)
}</pre>
```

Screenshoot program

//tambahkan tangkapan layar dari program (boleh lebih dari 1 jika diperlukan) CONTOH TANGKAPAN LAYAR: (GUNAKAN NOTEPAD)

Deskripsi program

Jelaskan kode yang ada di source code, semakin detal semakin baik nilainya

2. SOAL 2

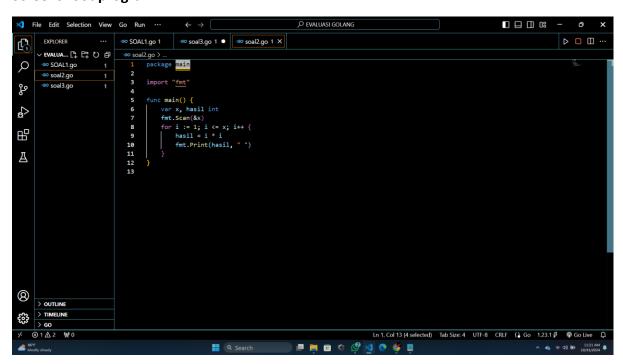

Source Code

```
package main

import "fmt"

func main() {
    var x, hasil int
    fmt.Scan(&x)
    for i := 1; i <= x; i++ {
        hasil = i * i
        fmt.Print(hasil, " ")
    }
}</pre>
```

Deskripsi program

3. **SOAL 3**

Source Code

```
package main

import "fmt"

func main() {
   var q int
   fmt.Scan(&q)
```

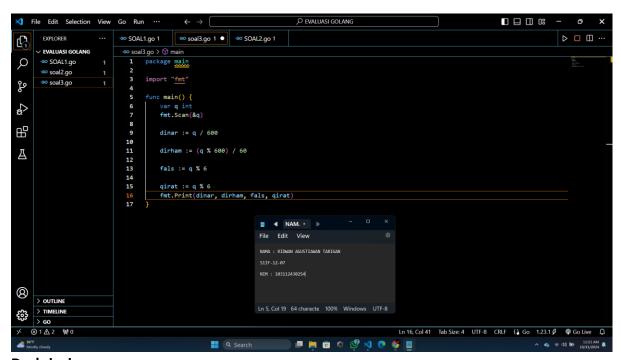

```
dinar := q / 600

dirham := (q % 600) / 60

fals := q % 6

qirat := q % 6
fmt.Print(dinar, dirham, fals, qirat)
}
```
